22/10/2026

Name- S. Rajeswari

Reg no- 192312140

ITA0329

IIB0329 Mobile Computing

CO2 - AT1

12/15

1. (C)- Space Division Multiple Access (SDMA)
2. (C)- A smartphn running a navigation app
3. (B)- TDD allows for dynamic allocation of time slots to better match the symmetric traffic load
4. (D) - 25 dB
5. (D)- TDMA allows the satellite's power amplifier to operate more efficienty with less intermodulation distortion.
6. (C)- To allocate different frequency bands to mobile devices based on the distance from base station
7. (C) - The introduction of digital encryption and support for SMS and also data services.
8. (B) It allows the network to adapt to varying radio conditions, optimizing throughput for each user.
9. (A) - BSC-1 informs MSC of need for a handover.
10. (D) - To ensure the network is aware of MS's availability.
11. (A) - Serving GPRS support -
12. (C)- DECT primarily uses a TDMA
13. (B) - The introduction of Authentication Token.

(14) (A) - A service based architecture (SBA).

(15) (C) - Adjacent channel interference, mitigated by using guard bands between subcarriers.
